

Basics

```
Router> user mode
```

```
Router>enable
```

```
Router# privileged mode
```

```
Router#configure terminal
```

```
Router(config)# global configuration mode
```

```
Router(config)#hostname RTR1
```

```
RTR1(config)#
```

Note that these commands work on Cisco routers and switch

Passwords

```
RTR(config)#enable password cisco
```

```
| set enable password
```

```
RTR(config)#enable secret mysecret
```

```
| set enable secret password
```

```
RTR(config)#line console 0
```

```
| enter console line mode
```

```
RTR(config-line)#password myconpwd
```

```
| set console password
```

```
RTR(config-line)#login
```

```
| require password to be entered
```

```
RTR(config)#service password-encryption
```

```
| hashes passwords so they aren't readable in configs
```
